Office Action Summary

Art Unit: 2733

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: In page 2, lines 22, recitation "netsufling" is misspelled. Appropriate correction is required.

Claim Rejections - 35 U.S.C. § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In page 9, lines 7-9, it is unclear how the longitude is measured by feet and inches. The longitude is usually expressed in degrees or in hours, minutes and seconds. It is also unclear how the position of the apparatus is measured by its altitude. The position of an object is usually measured by its latitude and longitude (coordinate values).

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2733

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 5, line 8, recitation "detecting a current position" renders the claim vague since it is unclear as to of what the current position is referred. The scope of the claim is therefore unascertainable.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kamiya et al (USP 5,751,228) teach a guide system having a GPS unit. Ninomiya et al (USP 5,220,508) teach an apparatus comprising image fetching means and position detector.
